DETAILED ACTION

1. Claims 1-12 are pending in the application.

Information Disclosure Statement

2. Acknowledgment is made of applicant's Information Disclosure Statement (IDS) Form PTO-1449, filed 22 March 2004. The information disclosed therein was considered.

Allowance

3. Claims 1-12 is allowance.

The following is an examiner's statement of reasons for allowance:

There is no teaching or suggestion in the prior art to: **"copying uncorrected data units of the first block into the second block thereby to consolidate in the second block corrected and uncorrected units of data originally of the first block"** as claimed in the independent claim 1; or

"utilizing the stored information, correcting any errors in the data read from the at least one location in the array and writing the corrected data into the array" as claimed in the independent claim 7; or

"the corrected data remain stored, programming or reading other data to or from at least locations within the array other than at least one location and thereafter writing to corrected data into the array" as claimed in the independent claim 9; or

“determining that the errors in the read data can not be corrected, re-reading the data stored in the at least one page with a second set of read conditions” as claimed in the independent claim 11.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

5 The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Conley et al (US. 6,426,893) disclosed the multiple sectors of user data are stored at one time by alternately streaming chunks of data from the sector to multiple memory blocks.

Conley et al (US. 6,760,255) disclosed the flash eeprom system with simultaneous multiple data sector programming and storage of physical block in memory device.
